The Huirou Commission AIDS Campaign has grown out of the direct experiences and realities of grassroots women leading holistic development initiatives related to AIDS in their poor urban and rural communities. Our program at the IAC seeks to open venues for grassroots women from Africa and Latin America to share their concrete strategies, knowledge and approaches to HIV and AIDS, to create regional and global platforms for peer learning and action, and to link to supportive partners.

For more information on our program, contact Shannon Hayes: Shannon.hayes@huairou.org
